## **DETAILED ACTION**

### ***Claim Objections***

Applicant filed two sets of claims on September 20<sup>th</sup>, 2007. Due to applicant's arguments stating amendments were made consistent with a full marked up copy of the claims, that set has been examined in the following Office Action. The "Clean Copy" of the claims failed to include the previous amendments to claim 21 and failed to include claim 22 altogether.

### ***Claim Rejections - 35 USC § 112***

The amendments to the claims filed on September 20<sup>th</sup>, 2007 are acknowledged and accepted by the examiner. The previous 35 U.S.C. 112, first and second paragraph rejections have been overcome and are hereby withdrawn.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-12 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by McIntyre (US Patent 3,746,066).

McIntyre discloses (**Figures 1-3**) a cover/shield (**1**) comprising: a flexible, hollow cap/casing pouch; a cinch ring portion (top of **Figure 2** extending down to **16**) to close a box-like aperture by drawstrings through a tubular section of the cinch ring portion; and

the cinch ring also having openings (16) to allow sutures (5a, 5b) to pass through to allow the cap/casing to tighten vertically toward the cinch ring.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over McIntyre.

McIntyre discloses all of the claimed limitations except is silent as to the cap/casing being made of GoreTex™, Dacron™, or polyurethane. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the device of McIntyre with the claimed materials, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

***Response to Arguments***

Applicant's arguments filed on September 20<sup>th</sup>, 2007 have been fully considered but they are not persuasive. In response to applicant's argument that McIntyre is incapable of being permanently installed over instrumentation while providing a barrier for preventing ingrowth of bone or fibrous tissue, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention

and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. There is no structure of McIntyre preventing the device being placed over bone instrumentation permanently.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
